

Marine Invertebrates Collection

Activity Book – Easy

UC Davis Biodiversity Museum Day 2021

Dichotomous Key – Pages 2-4

Crossword Puzzle – Pages 5-7

Coloring Sheet – Page 8

Whose Shell is This?

Scientists can use a tool called a dichotomous key to help them identify different animals. Try picking one shell at a time from the picture above, carefully observe it and answer the yes or no questions on the next page. Follow the arrows to see if you can figure out what animal the shell belongs to!

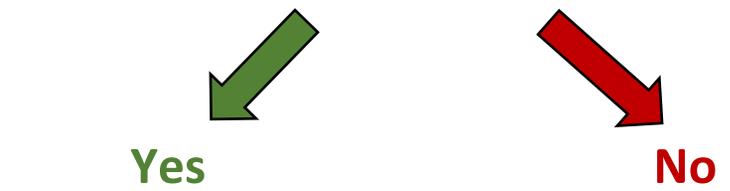

Does the shell have two halves?

Is the outside dark in color?

Is it swirled?

Is it pointy on both ends?

It's a mussel's shell!

It's a whelk's shell!

It's a limpet's shell!

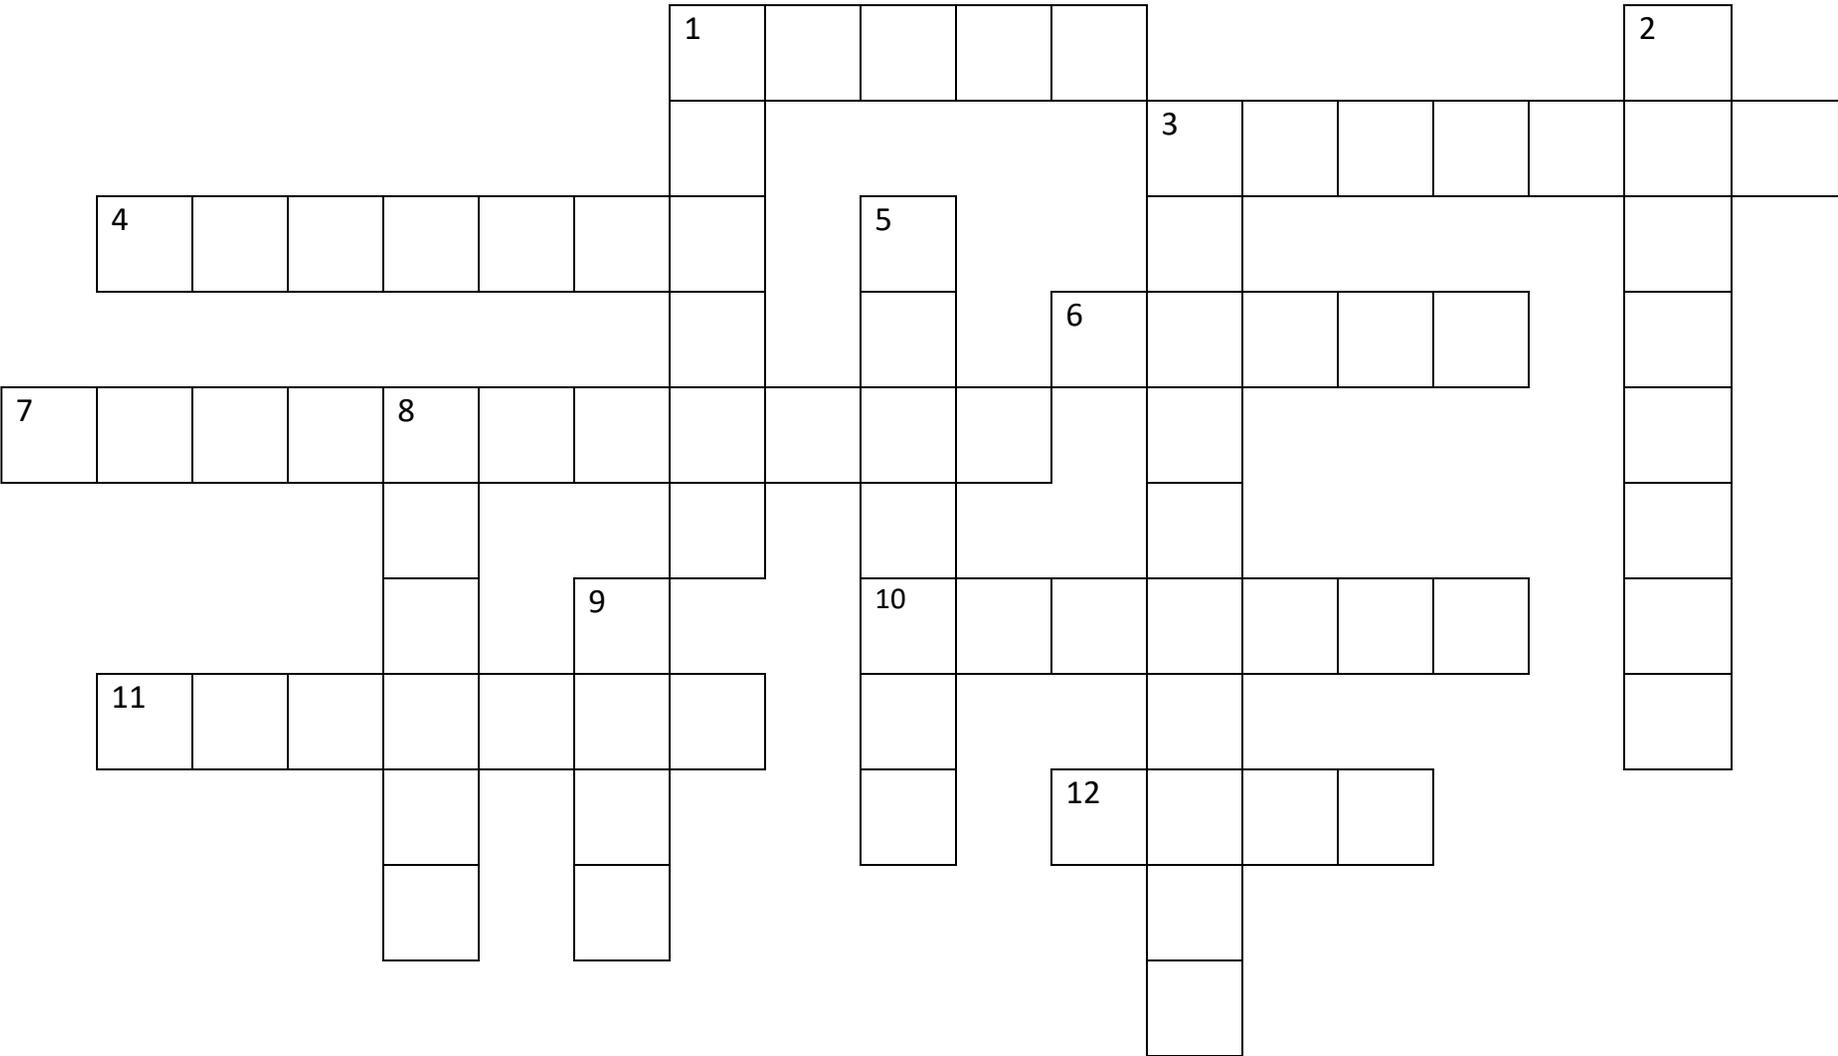

It's a clam's shell!

It's a turban snail's shell!
